OBJECTIVE

Current People Platforms and Analytics Associate specializing in Jira configuration and process automation. Looking to bring hands-on experience in building custom workflows and streamlining cross-functional intake processes to a part-time technical role.

WORK EXPERIENCE

People Platforms Analytics and Associate (Converge ICT Solutions)

July 2025 - Present

- Connected Jira with automated tracking systems to unify request intake and resource allocation, optimizing project delivery timelines for both People teams and broader enterprise stakeholders.
- Designed automated Jira tracking mechanisms that accelerated request routing and task delegation across diverse business functions, eliminating operational bottlenecks and boosting team velocity.
- Integrated Jira with automated tracking mechanisms to streamline cross-functional intake and task assignment, scaling operational efficiency across HR, Finance, and multiple business units.

Student Employee - Registrar's Office (SPCBA)

Mar 2022 - Jun 2025

- Encoded and maintained student records ensuring data accuracy and confidentiality.
- Responded to student and faculty inquiries via email and phone, and processed requests including graduation credentials and CHED-related documents.
- Organized and filed institutional documents such as memos, registration forms, withdrawal, and shifting forms, and supported the preparation of reports for government submission.
